

PROBLEMS

“Being suffering from disease or pain and still pushing yourself to go to the hospital.”

That’s the worst feeling one face during illness!

One going to the hospital may face these problems:

- Patient at the hospital is prone to harmful infections that could make their condition worse
- **Overcrowded and noisy environment of Hospitals may create problems**
- There are many patients in the hospital, so doctors can’t pay individual attention to each patient.
- **Psychological Stress in patients could be seen at crowded hospitals.**
- Due to mismanagement of hospital authority there can be many medical errors too.
